To get at the truth behind the history and current state of sex education, SEX(ED) examines sex education films from the 1910s up to the present day. Often hilarious, sometimes instructive, and almost always awkward and embarrassing, these films reflect the changing moral, cultural and political attitudes that inspired them. #15930/0645 77 minutes 2013 \$189.95 (Colleges & Universities \$379.95) \*CC \*SA

### **\*Brand New!** RAISING CHILDREN IN A DIGITAL WORLD with Dr. Gordon Neufeld **\*Canadian!**

The digital revolution has happened so quickly that it has caught most of us off guard. Yet the digital world is here to stay, changing our society in ways that have far-reaching consequences for our children. What are the implications for parenting? How do we harness the spectacular connecting potential and yet avoid the pitfalls of attachment technology gone awry? How do we prepare them to live in this new world and yet preserve what is required for healthy development to take place? We have followed our children into the digital world and yet for their sakes as well as ours, need to restore our lead in order to avoid the insidious dangers that live in the shadows of this potent technology. Dr. Neufeld looks at the digital revolution as a developmentalist committed to helping parents help their children become all they were meant to be. In this program, we show viewers how parents can harness the unique power of their position to get the results they seek. We offer concrete examples of adults meeting their own needs and encouraging children to do the same, in ways that are simple, socially acceptable, effective, and positive. We explain that real change happens with practice over time, not in an instant or in a particular moment. And we demonstrate that learning to handle conflict, disappointment, or anger is not like learning how to spell a single word - it's more like learning to speak an entire language. #16000/1120 17 minutes 2015 \$129.95 \*CC \*SA

Sunny Clifford, her twin sister, Serena, and Brandon Ferguson are neighbors in Kyle, a small town in the heart of the Pine Ridge Reservation. Their political awakening begins when Cecelia Fire Thunder, the first female President of their tribe, defies a South Dakota law criminalizing abortion by threatening to build a women's clinic on the sovereign territory of the reservation. In the subsequent political storm, Sunny, Serena and Brandon are faced with difficult choices. YOUNG LAKOTA is a uniquely sensitive portrait of bright young people at a galvanizing stage of their lives whose cultural pride is informed by a continually uneasy relationship with mainstream American political culture.

**MEDIA STUDIES**

**\*Brand New! EMPATHY GAP (THE): Masculinity and the Courage to Change**

In THE BRO CODE and GENERATION M, filmmaker Thomas Keith examined how American culture bombards young men with sexist and misogynistic messages. In THE EMPATHY GAP, he looks more closely at the ways these messages short-circuit men's ability to empathize with women, respect them as equals, and take feminism seriously. Keith begins by exploring some of the key messages about manhood that boys absorb from the culture -- that they should acquire material wealth, meet conflict with aggression, harden themselves, suppress all human emotion except anger, and view women primarily as sexual objects -- then argues that these messages not only devalue women but also undercut men's innate capacity for caring and empathy. Along the way, he draws fascinating parallels between sexism and racism, spelling out how each is rooted in cultural norms that discourage empathy, and shows how men who break with these norms live happier and healthier lives.

**\*Brand New! GUYLAND: Where Boys Become Men**

"Guyland is a powerful exploration of what it means to be a young man today." Michael Kaufman, Co-Founder of the White Ribbon Campaign In this powerful new film based on his bestselling book, acclaimed sociologist Michael Kimmel maps the troubling social world where boys become men - a new stage of development he calls "Guyland." Arguing that the traditional adult signposts and cultural signals that once helped boys navigate their way to manhood are no longer clear, Kimmel takes us inside a new social order where more and more young men try desperately to prove their masculinity to one other - often with dangerous consequences for young women and guys themselves. Guyland offers a way for all of us - parents and community members, young men and women, professors and administrators - to envision new ways to support boys and young men as they navigate cultural environments that glorify unhealthy, violent, and sexist models of manhood.

\*Guyland is essential viewing for courses in gender studies, sociology, media studies, communications, counseling, and psychology.

**\*Brand New! TV FAMILY: Behind the Scenes of the First Reality Television Program**

How REAL is REALITY TV and what are they selling?! In 1960, NBC aired what is widely considered to be the first "reality television" show in American broadcast history called Story of a Family. Media scholars and television historians have long recognized its significance as a precursor to the unscripted(?) television programming that dominates American television today. Tells the story of how the show's producers carefully choreographed the way they wanted the family to appear to the American public -- all in the name of authenticity. The result is an eye-opening look at one of the television industry's earliest attempts to shape the "reality" of family life in commercially viable ways. Ideal for courses that look at media culture, commercial television, communication, documentary, and television history.

**\*Brand New! THE ILLUSIONISTS: A Film about the Globalization of Beauty**

THE ILLUSIONISTS examines how global advertising firms, mass media conglomerates, and the beauty, fashion, and cosmetic surgery industries are changing the way people around the world define beauty and see themselves. Taking us from Harvard University to the halls of the Louvre Museum, from a cosmetic surgeon's office in Beirut to the heart of Tokyo's Electric Town, the film explores how these industries saturate our lives with narrow, Westernized, consumer-driven images of beauty that show little to no respect for biological realities or cultural differences.

**\*Brand New! CONSUMERISM AND THE LIMITS TO IMAGINATION**

In this illustrated presentation, media scholar Justin Lewis makes a compelling case that consumer capitalism can no longer deliver on its promise of enhancing quality of life, and argues that changing direction will require changing our media system and our cultural environment. Showing how consumer capitalism has become economically and environmentally unsustainable, Lewis explores how our cultural and information industries make it difficult to envision other forms of human progress by limiting critical thinking and keeping us locked in a cycle of consumption. He argues that change will only be possible if we take culture seriously and transform the very way we organize our media and communications systems.

**\*Brand New! DYSFUNCTIONAL SOCIETIES: Why Inequality Matters**

What distinguishing feature do the world's healthiest and happiest societies have in common? According to acclaimed author Richard Wilkinson, the answer is simple: they have far less income inequality than other societies. In this new film Wilkinson focuses on why the U.S., despite being one of the richest nations in the world, lags behind so many other rich Western societies in a number of crucial statistical measures - including life expectancy, violence, health, community, teen pregnancy, mental illness, and incarceration. The reason, he suggests, is that the immense wealth of the U.S. has been unevenly distributed among the American people. Mobilizing years of research, Wilkinson looks at the devastating toll economic inequality is taking on people around the world, and shows that societies with the smallest gaps between rich and poor enjoy the highest levels of health and happiness across all social and economic classes. The result is a timely and accessible reassessment of some of our most cherished socio-economic principles and myths.

**\*Brand New! THE OCCUPATION OF THE AMERICAN MIND: Israel's Public Relations War in the United States**

Over the past few years, Israel's ongoing military occupation of Palestinian territory and repeated invasions of the Gaza strip have triggered a fierce backlash against Israeli policies virtually everywhere in the world - except the United States. This film takes an eye-opening look at this critical exception, zeroing in on pro-Israel public relations efforts within the U.S. Narrated by Roger Waters and featuring leading observers of the Israeli-Palestinian conflict and U.S. media culture, the film explores how the Israeli government, the U.S. government, and the pro-Israel lobby have joined forces, often with very different motives, to shape American media coverage of the conflict in Israel's favor.
